- 5,534 GB-filled 8-inch projectiles
- 56,007 gallons (508,905 pounds) of liquid GB
- 23 igloos emptied

Leading the Way to a Safer Future

The Anniston Chemical Agent Disposal Facility is safely destroying the stockpile of chemical weapons stored at Anniston Army Depot while ensuring maximum protection for the environment, general public, and personnel involved in the disposal effort.

- Disposal is safer than continued storage.
- Incineration is truly a safe, efficient disposal process.
- The Army is committed to the safety of the community and the environment.
